

September 7, 2018

To: Eric Murphy, Project Contact

The American Forest Resource Council (AFRC) is interested in commenting on the **Mooreville Ridge Insect and Disease Resilience Project** that is listed on the Plumas National Forest Schedule of Proposed Actions (SOPA).

AFRC is a regional trade association whose purpose is to advocate for sustained yield timber harvests on public timberlands throughout the West to enhance forest health and resistance to fire, insects, and disease. We do this by promoting active management to attain productive public forests, protect adjoining private forests, and assure community stability.

Please provide public scoping documents and any other environmental documentation that are available for public review. Please keep me informed as the project progresses.

Thank you for the opportunity to comment.

Sincerely,

/s/Scott Stawiarski
